**More**

Starry night. Starlight can be used as adjustable brightness night lights, bedroom ambient lights, living room sofa table decoration lights, car ambient lights, playroom decoration lights, small home cinema strobe lights, study table and computer desk decorations. You can use the star projector in baby's room / bedroom / car / ward / living room / small home cinema / Christmas / Valentine's Day date / playroom / study room / computer room etc. The colourful and unpredictable mist is available in different colour combinations and decorated with flashing star lights that can be switched by remote control or buttons. The high-definition galaxy of starlight is projected on the wall and ceiling, so you'll feel like you're in a big galaxy, creating a romantic atmosphere and enjoying your free time. The Starry Sky Light has two control methods: the back button and the remote control. The back button only allows you to switch the light on, toggle the haze and starry sky mode and switch off with a long press; the remote control allows you to adjust the colour, brightness and blinking frequency of the haze and starry sky, as well as toggle the machine and time settings. Giving you the most convenient remote control experience.
