More

HD inspection camera and 3 m cable: thanks to the innovative design, the HD camera and WiFi are perfectly integrated into the durable integrated probe, small and portable. It can observe clear images and videos. Adjustable resolutions, e.g. B. 1920p/1280p 3 m semi-rigid cable, 360 degree rotation for easy selection of viewing angle.

Stable WLAN image transmission: With an improved WiFi chip of the new generation with a transfer rate of 20 frames per second and a frequency of 2.4 GHz, you simply download the app on your phone to view pictures in real time. Search for "Anesok" in the app store or download the app by scanning the QR code in the instructions. (Android 4.4+, iOS 9.0+ and above)

High compatibility: comes with 3-in-1 adapter power supply interface, compatible with 99% of mobile devices on the market (Type-C, micro USB, Apple). Important note: only applies to Android smartphones/tablets with OTG and USB UVC function. Simply plug and play the iPhone. Does not fit the computer.

IP67 waterproof and 6 LEDs: IP67 waterproof, diameter of the probe, 6 adjustable LED lights and thin, waterproof probe. This endoscope is suitable for different environments, e.g. B. Dimly lit or dark areas, damp or wet areas, etc.

Wide application: with the Wi-Fi snake camera, you can easily perform inspections and repairs on household appliances, sanitary installations and other problems and even connect small items that are out of reach with the equipped small hook.
