

Flying bee that responds to gestures

Generuota 2025-06-06

More

This is a great choice for those who want an active and emotional free time!
This toy develops and improves the child's reaction and movements, as it requires dexterity.
The bit can be directed forward/upward with hand movements, and it can also fly sideways when pointed properly!
It is completely safe to use because the wings are flexible, so it prevents hand injuries.
The flying bit can be both a decoration and a toy, because its wings are removable.
LED lights are visible during the flight, which create an even greater effect.
Not recommended for children under 14!
Charged with a USB cable. Responds to hand movements.
The flying bit is very fast, but very easy to control with gestures.
The wings are made of flexible material, so there is no chance of hand injury. This flying, gesture-controlled bit can also be used as a toy or decoration, as its wings are removable. It emits various LED lights while flying.
Can be used both indoors and outdoors.
