

KITE remote control/gesture-controlled car

Generuota 2025-06-07

Battery 7.4V 1200mAh

Model KITE remote/gesture controlled car

More KITE remote/gesture controlled car. Strong adsorption, dual mode, 360° rotation, bright and varied lights that appear as the car drives. Modern design and features. Tyre size increases the balance of the vehicle and improves speed. The tyres are hollow. Deep lines in the tyres increase friction, allowing the car to balance perfectly. Integrated four-wheel drive system. The car also emits dynamic music. Suitable for children aged 6+ years.

2 rechargeable batteries - extended battery life - unlike conventional remote control cars, it has a high quality battery which is better than conventional batteries. Two 7.2 V/1200 mAh high quality rechargeable batteries that last much longer than other rc cars on the market. 2.4GHZ radio technology - 1 handheld remote control and 1 clock controller included. This gesture-sensing RC car can reach speeds of 15 km/h. With the sensitive remote control, you can go forward / backward / left / right / drift without delay, fast response speed, with anti-interference protection, multiple RC cars can race at the same time, so you'll have more exciting experiences. 360 Degree Rotation and Flips - This SUV has 4 powerful motors, 360 degree rotation and flips, wall bump and back flips, built-in colourful lights and fun music, day and night play. This toy stunt car is suitable for racing on various terrains such as lawn, gravel, mud, stones, beach, and will give your child a variety of tricks to change the spin. A great gift idea for all occasions!
