

Clock Controlled RC Car (Green)

Generuota 2025-06-06

Colour

Green

More information

New - a clock with a built-in detachable mini RC racing car! Extremely convenient to use, the machine is controlled with the same watch. The remote control is especially convenient for children - control with only two buttons. The car can move forward, backward and in all directions. You can play board games with friends. The car will surprise you with its speed capabilities. The adjustable strap made of soft rubber is suitable for children's hands of various diameters. This is a great gift for both boys and girls!

The 2.4G infrared remote control ensures a stable signal and has anti-interference protection, does not confuse the remote control if multiple vehicles are racing together. The strap is comfortable, made of durable, safe and skin-friendly material.

The mini car toy is made of alloy material, and its surface is carefully processed, so it is not only resistant to wear and falling, but also does not harm children's skin.
