More

There are 8 types of filters
Real-time viewing on a 0.96" colour display.
Supports up to 128 GB TF/SD card
This mini camera/monitoring camera has a mirror-reflected design for a compact and elegant look. The term "mirrorless" often refers to the mirror mechanism commonly found in single-lens reflex (SLR) cameras, which improves image quality and control.
CMOS technology: The camera incorporates CMOS (Complementary Metal-Oxide-Semiconductor) technology. CMOS sensors are characterised by their energy efficiency and their ability to capture high quality images, making them suitable for a wide range of applications, including digital cameras.
Indoor and outdoor shooting/video recording: This mini camera is versatile and suitable for both indoor and outdoor use. Whether you want to monitor changes in the interior of your home or capture scenes outdoors, this camera is designed to meet your needs.
1080p resolution: the camera records video in full high-definition (1080p) resolution, resulting in crisp and clear images. This resolution is ideal for capturing detail, making it suitable for a wide range of recording applications.

Model

Y3000

Resolution

1920 * 1080p
