

## 12in1 Galaxy Lights Free Standing Projector

Generuota 2024-05-18

### Name

### Description

#### More

This galaxy projector has 12 display scenarios: the Solar System, Earth, Moon, Milky Way, Galaxy, Andromeda Galaxy, NGC4302-NGC4298, Hubble Deep Field, M60--UCD1, North American Nebula, Mystic Mountain and Small Magellanic Cloud.

By rotating the upper focusing head, the clarity of the image can be adjusted regardless of the projection distance. Supports projection distances up to 16.4 feet. The Solar System Projector can be rotated 360° for projection on ceilings, walls and floors.

The Galaxy Lamp can create a warm and calm sleep environment to help you and your child fall asleep. Please note that the projected image rotates slightly slowly, which is specially designed to simulate the real rotation of a starry sky.

#### NOTES:

The projector only works when connected to a power source.

### Colour

White
