Description

Hybrids model-GT8 7" video recorder with up to 4 cameras! Loop recording function that saves and locks the video during an accident. It has a parking function with lines, even 4 cameras, a very comfortable view of the truck from all sides! Recommended for 9V-36V trucks. High quality camera to make your night journeys easier. The image remains clearly visible. The monitor is mounted on a panel. The monitor can display all 4 cameras simultaneously. Recording takes place in time intervals or until the card is full. Cycle - if the card runs out of space, write from the beginning on the images already recorded. The device is used for:
In cars as a visual aid for accident proof or preventive control;
In tourist trips;
Taxi cars;
Special-purpose machinery and vehicles;
Long-distance trucks.
