

## LED photonic light face mask, 7 colors

Generuota 2025-07-06

Name

Description

Model

LED photonic light face mask.

More

LED photonic light face mask, 7 colors. Let's first start with what phototherapy is: WHAT PHOTOTOTOTHERAPY IS - the technology of LED phototherapy application is the treatment of tissues with light of a selected wavelength (7 different options have been selected, for a description please see the auction). They penetrate the inside of the skin without direct intervention. The treatment is completely painless, stimulating various biological and chemical changes. The use of light greatly improves the condition of the skin and accelerates its regeneration. NON-INJURING AND EFFECTIVE TREATMENT - the use of the mask is in no way painful for our skin and its use has many benefits, namely the removal of acne and various discolourations or scars, the reduction of wrinkles, nourishment and improvement of the skin's elasticity, and delaying. The aging process also helps to get rid of puffiness under the eyes. Photon therapy using led mask is safe for all skin types. FLEXIBLE headband - includes a flexible screen saver that allows you to adjust to the volume of your head. Phototherapy is recommended for both women and men, regardless of age. HOW DOES IT WORK? A beam of light penetrates the skin and reaches the cells inside, stimulating their processes. Its effectiveness can be compared to that of a laser, but the LED mask is painless to use. It does not affect the structure of the cells and naturally activates them. Remember! Before using the mask, wash off your make-up thoroughly. The mask illuminates only clean skin. For long-lasting effects, it is recommended to use 10-20 treatments every 2-3 days. They protect and preserve the eyes, no light passes through them, so the mask is completely safe and does not affect the eyes in any way. We have included an elastic band that will allow you to adjust to any head diameter!

FUNCTIONS

Made of eco-friendly ABS material, non-toxic, odourless, healthy and durable. 7 red, blue, green, yellow, purple, white and cyan bulbs to choose according to your needs. Each bulb has 10 gears to adjust the intensity of the light. Each bulb has a timer function, with an effective control of 5/10/15/20/25/30 minutes. Stimulates skin metabolism, improves the appearance of blackheads, tightens pores. Cleanse the skin, break down pigment, dilute blemishes. Activate skin collagen secretion, dilute fine lines, firm skin. No surgery, no needle, safe and fast skin treatment and protection. The mask conforms to the contour of the face for a comfortable and wearable fit. Suitable for all skin types.

Name	Description
Colour	Apparatus: white. Number of colors/60/in: 7 + multicolor.
PAPILDOMA	Set the timer - 5/10/15/20/25/30/35/40/45/50/55min, choose the right colour - 7+ multicolours. You will see every setting on the transparent display!
